

# Project-Time

---

## General information

The **Projekt-Time Modul** enables the user to book project times live via web or smartphone or to enter them afterwards.

For the second option the **project time recording mask** with integrated favorites function is available.

Users with **management** rights can also choose from extended **report functions**, which are described in detail under *Functions*.

The project management allows an arbitrarily deep structuring of the projects (superordinate projects, sub-projects,...).

### *The Functions in Detail:*

#### [Project time booking](#)<sup>1</sup>

*Start project time recording live via stopwatch (also available as Smartphone App)*

#### [Enter project time](#)<sup>2</sup>

*Recording / correcting project times afterwards using the mask provided for this purpose*

- **Info**

- [My project times](#)<sup>3</sup>

- Output of your own project time bookings, filterable according to various criteria*
