Use of the filter

This document demonstrates the **operation of the filter function** using the example of "Uncompleted requests¹". However, the same options are also available for "Open ToDos"

The filter function (Show Filter) allows you to search for specific requests in the workflow lists.

This function is available for

- every staff member for their own requests and processes
- local administrators for all employees of the organization

Open ToDos										
Perform marked actions	2 Refresh	Selection 🔻	Q Show Filter	Ø Hide Progress						🔒 Print
ToDo assigned		₹ Auth	or of Process		\$ A	ctivity	Details	Progress	Action(s)	

Now click on the button to open the input screen.

Open ToDos											
Perform marked act	ions 2 Refresh	Selection •	Q Hide Filter	Ø Hide Progress							🖨 Print
Author of Process Ty	pe to search for person	• Creation da	te from		to		Apply Filter				
Group	pe to search for group	▼ Effect da	te from		to	8					
Process Ty	pe to search for process	• Available	Action	*							
ToDo assigned		🚽 Auth	or of Process			Activity		Details	Progress	Action(s)	

Using the following parameters (search criteria) you can then search for the relevant request:

Author of Process

Here you can search for a specific applicant > selection of the desired person (process author) from the list of names.

• Group

With this parameter, you can select a specific group (e.g. management or marketing), or search in all groups.

• Process

Search for a specific process (for example, all vacation requests of a desired person > Process vacation). If you want to see all requests, select "All processes" as parameter

• Creation date from / to

Search for requests with a specific creation date (it is possible to enter either from - to date, or for example only to date to see all requests submitted up to a specific date)

• Effect date from / to

All applications whose validity period is valid from the from date are displayed. In addition, you can limit the effective date with the to-date parameter.

The "Open ToDos" area contains an additional filter function: the status of the task can be selected under "Selection".
