Contakt infos

This tab contains various subtabs.

NOTIZ

Important: Please note Time limitation and Historisation¹ so that you achieve the expected effectiveness and historisation!

Phone and E-Mail

In this area, private and business telephone numbers and email addresses can be maintained.

Please note that the **business email address** of the employee is used by the system for all notification functions. Also a Login¹ with the **business** email address (instead of the user name) into the Personalwolke is possible, if the employee is an active user.

The telephone numbers maintained here can also be displayed in other views (especially the Attendance list² in time recording) if this has been configured by the administrator.

The recommended **input form** for this feature is +43 xxx xxxxxxxxxx

When using a smartphone, you can click on the phone number to copy it to the phone's call function and make a phone call by pressing the dial function.

Private addresses

In this section, **one or more private residential addresses** are entered and stored in a history.

Only one address can be marked as the **primary** (**registered**) **address** at any time. As soon as a new address is assigned to this attribute, HR-Expert automatically corrects the "Valid to" field of the address previously marked as primary.

The address is required for social security registration, or for any form of contract. The private address of the employee is also helpful for the coordination of any activity outside the company.

A **correspondence address** can be interesting if the employee is staying at a different address for a longer period of time, but is not registered there. An example of this could be that the tradesmen have to carry out a longer repair at the registration address.

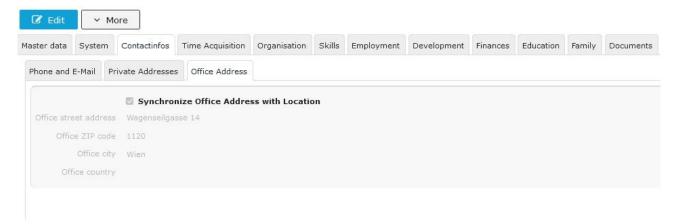

Below the entry screen, the active residential addresses are displayed, including all entries whose validity has expired.

On this screen there are the two system buttons "New" for entering a new address and "Delete line" to remove an entry from the list.

Important: Consider Time limitation and Historisation. so that you achieve the intended effectiveness and historization!

Business address

In this area, you maintain the current business address (employer's address / current usage site or office address). The address is required for the social insurance registration.

If you check the **Synchronize with assigned location** checkbox, HR-Expert enters the stored address (for the location). The prerequisite for this is an assignment to a location in the **Tab Organisation** - **Groups** 1 Organization - Groups tab, if these have been configured.

(In the example shown above the synchronize-feature is used. The address field is grayed, a changing of the address is only possible if the location addressed is changed or via de-synchronization.)

Instant messaging services

In this tab you can enter web services (e.g. facebook, Skype, Google+).

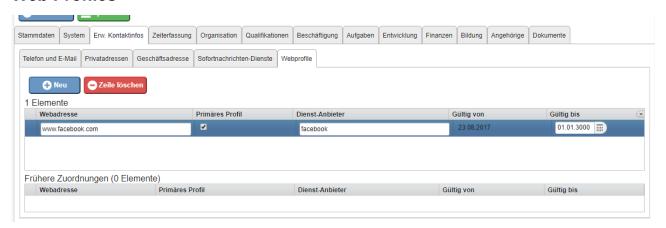

In the text field "Service provider" you can specify which service it is, also for the user name a text field is provided. With a tick 1 service can get the status primary.

In this tab, the **validity period** is not adjusted by the system, but can be edited manually at any time.

Expired accounts are listed below.

On this screen there are the two system buttons "New" for entering a new address and "Delete line" to remove an entry from the list.

Web Profiles

This tab differs only minimally from the (Advanced) Contact Info - Instant Messaging Services tab.

In this tab you can enter web services (e.g. facebook, Skype, Google+).

In the text field "**Web address**" you can specify how the profile is to be found, also the **service provider** can be specified in a text field. With a tick 1 profile can get the status **primary**.

In this tab, the **validity period** is not adjusted by the system, but can be edited manually at any time.

Expired accounts are listed below.

On this screen there are the two system buttons "New" for entering a new address and "Delete line" to remove an entry from the list.
