

# Account list

The account list provides an overview over specific time-accounts, relevant for the management or the HR-department.

The accounts shown in the list can be individually parametrized by the system administrator. The following account list represents a possible example.

- balance
- monthly target
- monthly actual balance
- disposable holidays
- business trip days/year
- etc.

The selection of the requested units/departments is operated either via the organigramm or the favourites-list. For detailed description of handling, please see chapter >> **Management**.

The system administrator may assign authorisations for the access to the journals of your employees. In this case you will see the journal-icon next to the employees name. A click on the journal will get you in the actual monthly journal of the respective employee.
