Ptm Effort Connector

This connector enables you to import **project efforts** into the system or to export them into a file. Here, the following fields need to be mapped and connected:

$activity	Activity within the project effort to be imported/exported
$customer	Assignment of a customer (if given) to the project effort to be imported/exported
$person	Person, who has performed the project effort to be imported/exported
$project	Project, which the project effort to be imported/exported refers to
$this	This field is developer-specific and can currently not be used by the standard user/administrator.
amountInMinutes	Duration in minutes of the project effort to be imported/exported
chargeable	false/true: is the to-be-imported/exported project effort chargeable?
comment	free comment for the project effort to be imported/exported
costObjectAccountingDone	
createdBySystem	true/false: was this project effort automatically booked by the system?
dayDate	date at which the project effort to be imported/exported shall be booked
foreignID	foreign key/ID for the connection with third-party-systems (not mandatory)
fromTime	Starting time of the project effort to be imported/exported
status	
toTime	Ending time of the project effort to be imported/exported
