

# PTM - System Settings

---

Webdesk EWP provides various additional tools for further configuration and automation as well as for importing and exporting large amounts of data to and from the system:

- **System Parameters**

System parameters are settings that affect the basic behavior of Webdesk. Some parameters are fixed settings, while others can be overwritten by user-client or person-specific settings.

--> [zu den verfügbaren Systemparametern in der Projektzeiterfassung](#)<sup>1</sup>

--> [weitere, allgemeine Informationen zu Systemparametern](#)<sup>2</sup>

- **Jobs**

Jobs serve as periodically running auxiliary programs for synchronizing and processing data. Jobs can be started automatically with the help of a so-called trigger, which can be set e.g. daily, weekly, etc...

<sup>3</sup> --> [weitere, allgemeine Informationen zu Jobs](#)<sup>4</sup>

- **Connectors**

The connectors provide a framework for the import and export of data to and from webdesk.
