

## 4.11.0

### Bug

- [[WD-10957](#)<sup>1</sup>] - Leaf elements should not have number as first column
- [[WD-11031](#)<sup>2</sup>] - Travel expense only shows region one day after region validity start
- [[WD-11123](#)<sup>3</sup>] - Summary value for account when using normal time is invalid
- [[WD-11124](#)<sup>4</sup>] - Columns in ta\_getOrgJournal client-side report are not aligned in accordance with the action config
- [[WD-11158](#)<sup>5</sup>] - RecordSpecial names containing a colon will not work correctly for getOrgTravel reports
- [[WD-11172](#)<sup>6</sup>] - Org action handler test: Table not displayed
- [[WD-11311](#)<sup>7</sup>] - Unarchiving Timemodels puts them at the end of the sorting order in lists
- [[WD-11363](#)<sup>8</sup>] - Split up the button labels of archiving and activating buttons for daily and weekly programs

### New Feature

- [[WD-6755](#)<sup>9</sup>] - Additional dynamic fields need to be assignable to a set of clients
- [[WD-10012](#)<sup>10</sup>] - Integrate Matomo into HRX Vaadin application

### Task

- [[WD-11041](#)<sup>11</sup>] - Legislation Improvements
- [[WD-11057](#)<sup>12</sup>] - Fix Jest tests on webdesk-ta-websdk
- [[WD-11118](#)<sup>13</sup>] - Remove cocoon dependency from JSON providers for react-report table
- [[WD-11198](#)<sup>14</sup>] - I18n Fix For Legislation Master Data

### Improvement

- [[WD-11050](#)<sup>15</sup>] - Allow embedded database for dockerized webdesk by setting environment variable
- [[WD-11051](#)<sup>16</sup>] - Render ta\_getOrgJournal reports using React
- [[WD-11141](#)<sup>17</sup>] - Improve NPM build artifacts
