

4.1.13

Release Notes - Webdesk - Version 4.1.13

Bug

- [[WD-8207](#)¹] - Wrong holiday entitlement calculated for vacation requests that end on the day the yearly entitlement is added
- [[WD-8208](#)²] - NumberFormatException when using char field in 6020 for number of vacation days
- [[WD-8209](#)³] - Displaying of vacation entitlement table in vacation request is only calculated when the to date is changed
- [[WD-8213](#)⁴] - Time corrections on days with an open booking interval should only close the booking interval if the timecorrection is within the open interval
- [[WD-8220](#)⁵] - Workflow-List: show confirmation dialog on button cancel

Task

- [[WD-8218](#)⁶] - Show package and process id in selection list configuration (wf_getOrgProcessInstances)

Improvement

- [[WD-8052](#)⁷] - TaCheckMaxWorkingTime: make it possible to use velocity scripts in mailbody
- [[WD-8173](#)⁸] - po_editUserSettings: make it possible to define the maximum validity of deputy assignments
- [[WD-8214](#)⁹] - Add method getRecordSpecialsAmountPaidByCompanyOfType(String commaSepeatedList) in TmTravelDecorator
