

### Bug

- [WD-1604<sup>1</sup>] - Validation errors in nested details-views for relation tables can not be handled correctly
- [WD-2205<sup>2</sup>] - Print buttons slide to the left in read-only mode
- [WD-5685<sup>3</sup>] - No Connection with Exchange2010: Timeout waiting for connections
- [WD-5733<sup>4</sup>] - Travel expense throws exception when adding files
- [WD-5749<sup>5</sup>] - Setting an effective termination date before its announce date should not be allowed as it is against the law
- [WD-5802<sup>6</sup>] - Synchronized Office Address is not updated when Location gets updated
- [WD-6199<sup>7</sup>] - Attach file causes a new line every time clicking next or trying to delete a row
- [WD-6236<sup>8</sup>] - executeAndStoreReports: in alfresco there is always the name of the first person in the person selection shown in parenthesis
- [WD-6285<sup>9</sup>] - Personal Calendar view in mobile view is broken
- [WD-6295<sup>10</sup>] - Projectchooser shows empty list when PtmOptions.initialListResultsLimit4ProjectChooser is too low
- [WD-6298<sup>11</sup>] - Action Icon Configuration - Position the preview closer to the input field where it is defined
- [WD-6308<sup>12</sup>] - Edit Client > Prefix Change Dialog > Close button does not work and keeps dialog in endless loop
- [WD-6320<sup>13</sup>] - Not possible to open dm\_folderExplorer.act with personal admin account
- [WD-6343<sup>14</sup>] - Groupware hint (blue triangle) not shown anymore in configurations of ta\_getOrgCalendar
- [WD-6370<sup>15</sup>] - Not possible to have more than one time correction in a time correction process
- [WD-6441<sup>16</sup>] - search field in search person action has help message icon in the middle of it
- [WD-6443<sup>17</sup>] - No more search functionality in fixed table header
- [WD-6450<sup>18</sup>] - Using Exchange 2016 implementation gives back a 401 unauthorised Error
- [WD-6453<sup>19</sup>] - Long descriptions do not get saved in stop-watch
- [WD-6458<sup>20</sup>] - Journeys sorted by type
- [WD-6465<sup>21</sup>] - Alignment of table cells is top but should be middle
- [WD-6478<sup>22</sup>] - Address validation in travel request / expense: validation message at wrong position causes issues
- [WD-6481<sup>23</sup>] - REST Webservices: wrong header is set
- [WD-6494<sup>24</sup>] - TravelExpense: estimated km via geocomplete plugin not refreshed when changing the address in tab kilometer allowances
- [WD-6538<sup>25</sup>] - Jumping between tabs in edit Person displays the "New employee form"
- [WD-6545<sup>26</sup>] - Setup Appraisal Interview on server personalwolke.at/webdesk3-test
- [WD-6551<sup>27</sup>] - Report definitions view is not loading due to wrong query in act-descr.xml
- [WD-6564<sup>28</sup>] - Access to action getLoginInfos.do from ptm-kios-app fails
- [WD-6571<sup>29</sup>] - Regression: Project-effort unusable after choosing a project from the project-chooser dialog

- [[WD-6577](#)<sup>30</sup>] - Upgrade script for setting the configHash as varchar in the DB
- [[WD-6578](#)<sup>31</sup>] - Audit Log NullPointerException triggered when trying to save project booking permission
- [[WD-6579](#)<sup>32</sup>] - ptm\_doProjectTimeBooking unusable without Ta-Connector
- [[WD-6587](#)<sup>33</sup>] - NullPointerException when performing a person "Termination" without entering any data
- [[WD-6588](#)<sup>34</sup>] - NullPointerException from service when performing a person "Termination"
- [[WD-6595](#)<sup>35</sup>] - Title does not get updated after shortname and/or name was edited and saved
- [[WD-6598](#)<sup>36</sup>] - sadmin is locked after update and forced password change
- [[WD-6608](#)<sup>37</sup>] - Social security registration displays error message
- [[WD-6618](#)<sup>38</sup>] - IE: Columns in salary accounting table form are too narrow (regression caused by WD-6414?)
- [[WD-6625](#)<sup>39</sup>] - Deleting a person created today causes TaRuntimeException - NumberFormatException: null

## Improvement

- [[WD-4051](#)<sup>40</sup>] - RecordKmBill - add field "KM-Abschlag"
- [[WD-4947](#)<sup>41</sup>] - On a new effort, a reasonable activity should be automatically chosen after selecting a project
- [[WD-5840](#)<sup>42</sup>] - TaPersonDAO Ta-Connector extension => change Start of Time-Recording to past
- [[WD-6177](#)<sup>43</sup>] - Make Default SalaryCode configurable in HrClientData
- [[WD-6276](#)<sup>44</sup>] - Intercept the event "browser window/tab closes" to prevent data-loss by a confirm-save dialog
- [[WD-6376](#)<sup>45</sup>] - Layouting in po\_showDataTransferHistory.act
- [[WD-6381](#)<sup>46</sup>] - Run only 6020 unit tests in a 32-bit JVM
- [[WD-6408](#)<sup>47</sup>] - Force password change of Full-System-Admin
- [[WD-6413](#)<sup>48</sup>] - Folder Explorer: add configuration option to open navigation tree by default
- [[WD-6414](#)<sup>49</sup>] - Folder Explorer: improve width of column "Name"
- [[WD-6475](#)<sup>50</sup>] - Do not select a relation table row initially when no details-panel is visible for it
- [[WD-6490](#)<sup>51</sup>] - After a successful password update clicking "Open application" does just that without again asking for authentication
- [[WD-6491](#)<sup>52</sup>] - Login Dialog: Hide section "Requirements to password security" if no such policy is defined
- [[WD-6509](#)<sup>53</sup>] - Tweak dataSources.xml to use environment variables
- [[WD-6558](#)<sup>54</sup>] - Delete Person-related data in RS-module
- [[WD-6585](#)<sup>55</sup>] - Display key of the PoKeyValue type in comment selection box

## New Feature

- [[WD-6355](#)<sup>56</sup>] - Social Security Deregistration workflow integration
- [[WD-6372](#)<sup>57</sup>] - Implementation of building blocks for the pseudonymization service
- [[WD-6503](#)<sup>58</sup>] - Display change-log information in HRX forms

## Task

- [[WD-2285](#)<sup>59</sup>] - Make Cocoon 2.2 compatible with Spring 4.2 and Java 8
- [[WD-6007](#)<sup>60</sup>] - Rest-Service default serialization
- [[WD-6234](#)<sup>61</sup>] - Fix Selenium test bugs in HR-Expert
- [[WD-6361](#)<sup>62</sup>] - Login on Kiosk-App
- [[WD-6363](#)<sup>63</sup>] - PTM-Kiosk: Get the latest running effort and display it
- [[WD-6364](#)<sup>64</sup>] - Get the bookable projects for the current user
- [[WD-6385](#)<sup>65</sup>] - Table columns are not aligned in Edge
- [[WD-6442](#)<sup>66</sup>] - po\_searchPerson: add help message and webdesk application context to velocity script field
- [[WD-6488](#)<sup>67</sup>] - Merge Delete and EditDelete Icons in Webdesk/Cocoon
- [[WD-6497](#)<sup>68</sup>] - Kiosk App: Setup Demo Client: Projects bookable per users
- [[WD-6506](#)<sup>69</sup>] - Unit test watching
- [[WD-6514](#)<sup>70</sup>] - Vaadin session-lock assertion error when directly inputting a browser address with an UID
- [[WD-6557](#)<sup>71</sup>] - UX pattern to toggle between All and a custom Selection set
- [[WD-6581](#)<sup>72</sup>] - Show error messages on unsuccessful save and do not allow to add rescheduling in the past

## Sub-task

- [[WD-6368](#)<sup>73</sup>] - Make process definition available for social security deregistration
- [[WD-6369](#)<sup>74</sup>] - Create configuration for social security deregistration
